

Dis

Design Mario Ruiz

The Dis chair combines solid, reliable materials with linear aesthetic. The unique push button adjustment mechanisms flow with the contours of the chair and work silently with ease. There are a wide range of options available for all aspects of the chair. The front is upholstered in fabric or leather to a streamlined standard or luxe extra cushion, the back can be finished to veneer, leather, polypropylene or mesh. The frame of the chair can be finished to a standard powdercoat or aluminium and the base offers 4 way on glides or castors and 5 way on castors.
