Bloom Circlet

By Keith Melbourne

Across flexible work and educational environments, Bloom Circlet provides a shared space to foster communication and interactivity.

Designed by Keith Melbourne, Bloom Circlet features a fully integrated modular lounge, screen and table collection of many components. The core element is the two seater lounge module in a concave form, based on two sizes of 2000mm radius and 1600mm radius, with upholstery detail used to define an individual's space.

The lounge modules may be formed to create a full circular forms or as separate modules. In focus or areas requiring an element of privacy, a slim line upholstered screen with signature stitch detail may be seamlessly mounted to the lounge.

An optional green screen is also available for the 1600mm Radius style, providing vertical greenery and privacy within indoor collaborative working environments.
