Lina Armchair

by Gianfranco Frattini

Originally designed by Gianfranco Frattini in 1955, the Lina armchair is one of the Tacchini Design Classics collection.

Technically advanced in its original form, the Lina armchair features a unique frame providing a solid, yet lightweight appearance. Lina is defined by the bent plywood element that supports the backrest before curving upwards to form the armrest.

Lina may be upholstered in a choice of house fabrics or leathers, with the timber components available in house stains of Dark Grey or Dark Walnut.

Lead time

14 weeks

Warranty

3 year structural warranty
